Ease for patients

videoDoc, the online doctor, has partnered with McCabes Pharmacy to allow Irish patients to see a doctor and have their prescription filled and delivered without having to leave their home. Doctors from videoDoc are available for consultation online via the videoDoc website or app. For patients who are unable or who would rather not travel to collect medication, videoDoc can send their prescription to McCabes Pharmacy who will then deliver the medication to the patient. McCabes offer same day delivery in Dublin and a next day delivery anywhere else in Ireland.
